

Hadi Pirmohamed

RIBA Part II, MArchD Student, Oxford Brookes University

Hi! I'm a MArchD student seeking a position as a Part 1 Architecture Assistant. I've worked on numerous design projects (RIBA Stage 0-4) as a freelance designer, a multi-disciplinary project and a mock client pitch during my time at University. I also ran an online company called ICONic DESIGNS which had developed my business insight and further enhanced my attention to detail.

EXPERTISE

- Creative Thinking
- Problem Solving
- Time Management
- Decision Making
- Active Listening
- Eye for Design
- Business Minded
- Team Working

INTERESTS

Football, Golf, Business

ARCHITECTURAL WORK EXPERIENCE

SELF EMPLOYED, FREELANCE ARCHITECTURAL DESIGNER

Loft Conversion + Single Story Rear Extension: July- Aug 2021
(RIBA 0-3)

Worked on a 4 bedroom detached house for a close relative in Watford, to design an extra bedroom and extended living space. The project involved communicating with the client remotely (due to Covid-19), through emails/zoom meetings, and producing 2D Adobe illustrator drawings of concepts.

Interior Renovation for an SME Office Space: Oct- Dec 2020
(RIBA 0-3)

Interior renovation project for a family members SME in Dubai. The project involved designing technical floor plans and visual renders for the 7000sq ft office space, while keeping in mind the differing views/ideas of each partner. This was managed through clear communication with partners individually and collectively.

Single Story Residential Extension: Oct- Dec 2019
(RIBA 0-2)

Involved in the early stages of the RIBA process (0-2) to design an additional bedroom/en-suite for my family's 4 bedroom detached house in Milton Keynes. This was presented using floor plans and a 3D SketchUp model.

OTHER WORK EXPERIENCE

FOUNDER, SELF EMPLOYED

ICONic DESIGNS, Jan- Oct 2021

Founded a business that designs & sells App Icons for clients to customise their iOS devices. Skills gained include time management, problem solving, marketing, financial management and web development. The website was coded from scratch using HTML and CSS code, with an Etsy page to sell products, and an Instagram page to market the business and products.

VOLUNTEERING

Zainabiya Islamic Centre, Sept 2019

Involved in preparing the centre for upcoming programs & events. Formed part of the security team responsible for locking/unlocking and activating/deactivating the alarm system. The tasks involved working at odd hours, exercising patience, and an attention to details to ensure the guests safety & security were maintained.

ARCHITECTURAL EDUCATION

RIBA PART II - MArchD APPLIED DESIGN IN ARCHITECTURE

Oxford Brookes University, 2021- 2023

Management, Practice and Law

Managed a team of 6, to form a fictional business competing with other firms, to pitch our ideas to the client and win the project. Tasks included managing & distributing workload according to team members strengths, scheduling meetings to discuss progress & ideas, setting deadlines to ensure sufficient time to rehearse the pitch, and creating/compiling the final presentation. The final client pitch and the majority of meetings took place on zoom (Covid-19).

Design Dissertation

Dissertation on the Urban Design of Milton Keynes, focussing on movement of people around the city. This dissertation explores design intent vs design reality by looking at the original plans created in 1967, and comparing them with today's reality. Using the lessons learnt, the dissertation then highlights possible design outcomes for the future of MK, looking 50 years ahead.

RIBA PART I - BSc ARCHITECTURE, 2.1

Coventry University, 2017- 2020

Jewellery Quarter Project - RIBA Stage 0-4

Designed an educational centre in Birmingham to revitalise connections in JQ. It was inspired by the word "Connect" and promoted connections through construction techniques and collaboration between building users. The double skin facade was carefully designed on the SE side the building to maximise on environmental and visual effects. This project was presented online using Microsoft Teams.

Multi-Disciplinary Project

A collaboration between architects, technologists, civil engineers, quantity surveyors and construction managers to design a university campus in Spain. As the architecture team leader, I finalised designs and communicated with the other disciplines. Communication difficulties and difference in opinions with the civil engineers was overcome through a better understanding of their role, and thought processes.

Dissertation

A guideline was created to compare traditional with modern methods of construction in relation to houses in the UK. The dissertation goes into depth explaining each of the construction methods, and how experts in the field should compare them with one another to help in decision making.

OTHER EDUCATION

THE COMPLETE WEB DEVELOPMENT BOOTCAMP

Udemy, Jan- Feb 2021

A 50h+ online course on Udemy learning how to code websites from scratch. The course comprised of both Front-End (HTML, CSS, JavaScript) and Back-End (Node, React, MongoDB) web development through creating 18 mini web pages and websites.
